EDUCATION

FAST National University of Computer and Emerging Sciences (FAST-NUCES) Expected June 2027

Bachelor of Science in Computer Science

Lahore, Pakistan

- Coursework: Data Structures, Algorithms, Databases, Computer Systems, Machine Learning, Software Engineering

EXPERIENCE

Apex Geeks Software Solutions

May 2025 – Aug 2025

Full Stack Developer Intern

Remote

- Developed and maintained full-stack web applications using **Next.js**, **React.js**, and **Node.js**, delivering responsive, production-ready features for client projects.
- Designed and integrated **Supabase (PostgreSQL)** backends, including database schema design, authentication, and real-time data synchronization.
- Built and consumed RESTful APIs, implemented reusable UI components with Tailwind CSS, and collaborated with the team through Git-based workflows and code reviews.

PROJECTS

FocusFlow AI | *React Native (Expo), TypeScript, Node.js, Express, SQLite, Python (scikit-learn)* | github 2025

- Built a full-stack productivity platform comprising a React Native mobile app, a Node.js/Express REST API with JWT authentication, and a Python ML service via a Node-to-Python bridge.
- Trained and deployed 3 scikit-learn regression models on a 19-feature student lifestyle dataset to predict productivity score, study hours, and optimal break intervals.
- Implemented Pomodoro-style focus sessions, AI-generated daily/weekly schedules, and an analytics dashboard tracking focus hours, streaks, and completion rate.

Learning Management System (LMS) | *React, Node.js, Express, Microsoft SQL Server* | github 2025

- Developed a role-based LMS for Students, Teachers, and Management covering enrollment, grading, attendance, notices, and fee management.
- Designed and implemented 30+ RESTful API endpoints with JWT authentication and Microsoft SQL Server integration.

TrustLock – Screen-Time Manager | *Java, Android (Gradle), XML, Supabase* | github 2024

- Built a native Android application for parental screen-time monitoring, app-usage tracking, and approval-based access control.
- Integrated Supabase (PostgreSQL + serverless functions) for real-time data synchronization between parent and child devices.

ActivityConnect (Linkup) | *React, TypeScript, Supabase, PostgreSQL* | github 2024

- Designed a community platform helping users discover and join real-world activities, addressing the lack of offline-focused social features in mainstream apps.
- Built a responsive React + TypeScript frontend with a Supabase (PostgreSQL) backend for activity creation and discovery.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, REST API Development, JWT Authentication & Authorization

Databases: Microsoft SQL Server, PostgreSQL, SQLite, Supabase, Database Design & Management

Mobile: React Native, Expo, Java, XML, Android Development

Tools: Git, GitHub, VS Code
